REPORT of the Directors, to be submitted to the Fifteenth Ordinary General Meeting of Proprietors, at the London Tavern, Bishopsgate Street, at One o'clock precisely, on Wednesday, the 17th December, 1862.

---

In submitting their Annual Report and Statement of Accounts for the year ending 31st October, 1862, the Directors beg leave to congratulate the Proprietors of the Crystal Palace Company on the cheering result of the year's working, and on the favourable aspect of their affairs in general. An inspection of the Revenue Account will shew that the net amount carried to the credit of Revenue has reached the sum of £60,702 16s. 5d., being considerably in excess of that earned during the preceding twelve months. Deducting the amount applicable to Dividends on the Preference and Debenture Stocks, and other necessary charges, there remains at the credit of the General Revenue Account the sum of £33,017 7s. 4d., available for division amongst the Proprietors of Ordinary Capital. Out of this the Directors recommend the payment of a Dividend of

Three per cent (3s. per share) leaving a balance of £2,929 12s. 4d. to be carried forward.

This satisfactory increase in Revenue is accompanied by a corresponding improvement in general financial position, as a glance at the accounts will show. From the General Balance Sheet it will be seen that the heavy item formerly charged under the head of Loan Accounts has disappeared, while the Capital Account shows that the Mortgage-Debentures outstanding are now reduced to the insignificant sum of £6,900. Thus the Company is now, for the first time, practically free from debt. Nor does this gratifying result stand alone, since it will be seen from the General Revenue Account that Revenue will for the future stand unencumbered by any bygone liabilities, and be left available for Dividend—subject of course to the annual charges, and to the expenditure necessary for the current maintenance of the Building. This position has been attained by writing off the sum of £7,101 5s. 3d.—being the Balance of Expenditure, which the Proprietors are aware was carried over from last year—from the then Reserve of £10,176 15s. 2d. This step the Directors have decided on taking because they believe that under the improved aspect of the affairs of the Company, and the state of efficient and substantial repair in which the Building now stands, the same contingencies need not be apprehended which formerly led them to maintain the Reserve at so large a figure; while they also consider it very undesirable to clog the revenues of future years by carrying over amounts as a charge against them, unless an urgent necessity for such a course shall appear to exist.

The Proprietors are already aware that after the severe gales of 1861, the Directors considered it imperatively necessary to have the Building examined by a competent professional authority. They accordingly requested Mr. Edwin Clark, the eminent Engineer, to make a complete investigation of the whole structure, and the necessary works have been executed in accordance with his advice. The Report of that gentleman is submitted herewith, and it will prove to the Proprietors that the outlay

was absolutely unavoidable, and has been judiciously and effectively applied; and, further, that the confidence of the Directors in the future stability of the Building rests upon good foundation.

The Exhibitors' Department still maintains the steady rate of progress which has distinguished it during the last few years, and the Rental to the end of October last exceeded £14,000. This amount has been realised notwithstanding some sacrifice of income from the removal of a considerable number of tenants, who were not satisfactory either in their mode of doing business, or in the character of the articles they exhibited. The sacrifice is, however, amply compensated by the general improvement in the Department. The Directors look forward to a large accession of Exhibitors for the current year; having already, since the 31st October, made arrangements for additional rentals to the amount of about £2,000, from parties of reputation and standing. It is hoped that by careful attention to the interests of the numerous tenants of the Company, the present satisfactory position of this important branch of the Revenue may be fully maintained.

The Directors consider it due to Mr. Strange to refer to the increased amount of Rental received from him, and to express their satisfaction at the manner in which he has discharged the duties of his Department, which have necessarily been very onerous, owing to the large attendances of the past season.

The total number of Visitors during the year has been 2,020,219. On several occasions there have been very large attendances. The Proprietors will doubtless have remarked the return on the "Foresters' Day," August 19, viz. 83,721—not only the largest number yet attracted to the Palace on any one occasion, but exceeding by more than 15,000 the numbers visiting the International Exhibition on its most crowded day.

A considerable portion of the surplus land of the Company has been realised during the past year, at very favourable

prices. The amount received from this source will be found credited in the General Balance Sheet, and is thus brought in aid of Capital.

The prospects of the Crystal Palace, as regards increased Railway accommodation, continue to be very encouraging.

The Directors alluded in a former Report to the important Line of the South London and Crystal Palace Junction Railway, by which communication will be provided between the Termini at Victoria and Fleet Street, and the front of the Palace, a few feet only below the main floor. An agreement has been executed between the two Companies, under which, besides other advantages, this Company will receive a considerable sum for the land required for the Railway, which sum will come in relief of the expenditure on the Dulwich Wood Estate. It is understood that contracts have been entered into for the whole of the works of the Line, but the land belonging to this Company has not yet been entered upon.

Various Railway projects are announced for the coming Session of Parliament, which, if carried out, will give great additional facilities of access to the Palace. Among these the most prominent are :—

That of the Brighton Company, for a line from the present Crystal Palace Station, skirting the outside edge of the Park, and landing its passengers at the North end of the Building, on the level of the Machinery floor.

That of the South London Company, for continuing their Line, already referred to, from its high level in front of the Palace to the Norwood Junction.

Those of the Chatham and Dover Company, and of the Brighton Company, for extensions to Greenwich and Woolwich.

That for a Line across the Thames from Tower Hill, uniting the Blackwall and North London Lines to the Lines on this side the water.

It is to be regretted that the opening of the Junction at Falcon Lane—between the South Western System and the

West End Line, whereby the population of the Kew and Richmond District would be enabled to visit the Palace—and of the Kensington and Wandsworth Line, in direct connection with the North Western, Great Western, and North London Lines, should be so long delayed. The interests of this Company, no less than of the respective Railway Companies, are suffering materially by the delay, and it is earnestly hoped that some means may be found to hasten the early completion of both undertakings.

The Directors cannot close their Report without briefly recapitulating the main features of the present encouraging position of the Company. The Proprietors have now, for the first time, achieved three important advantages.

1. The Company is free from floating debt. Its Financial position is sound and satisfactory; and its Revenue not burdened by the encumbrances of former years.
2. The Building is in a more thorough state of repair, and in greater stability, than it has ever yet been.
3. The permanent attractions of the Palace and Park have attained such a pitch of matured beauty, as to compel universal admiration. During the past season the Crystal Palace has not only, by common consent, surpassed its newest and most dangerous competitor, but by the unanimous voice of the thousands who visited it from every quarter of the globe, has been proclaimed to stand unrivalled for its charms as a place of public resort in this or any other country.

Without arrogating to themselves any undue share of the merit of these three great facts, the Directors will only say that it is the earnest endeavour of themselves and the General Manager so to maintain the Establishment as to continue its progressive career, without relaxing their vigilant watch on the minutest details of expenditure.

By order of the Board,

THOS. N. FARQUHAR,

*Chairman.*

CRYSTAL PALACE,

*December 5th, 1862.*

### NOTICE OF MOTION.

The Directors have received notice of the following Resolution intended to be moved at the Meeting by Lieut.-Col. H. Young :—

“That no persons, either Shareholders or their friends, be admitted to the Crystal Palace without payment.

“That such admission on the Lord's Day is specially injurious to the character and interests of the Company ; and is virtually, if not actually, a violation of the Company's Charter ; and of the injunction granted by the Vice Chancellor against the Directors in 1858 ; while it openly sets at nought the commandment of God, ‘Remember the Sabbath day to keep it holy.’”

## MR. EDWIN CLARK'S REPORT.

*To the Chairman and Directors of the Crystal Palace Company.*

24, GREAT GEORGE STREET, WESTMINSTER,

Nov. 28<sup>th</sup>, 1862.

Gentlemen,

On being requested by you to examine into the stability of the structure of the Crystal Palace in the spring of 1861, I made a careful examination of the whole of the edifice.

With respect to the Nave, and all the low portions of the Building, I found that nothing more was required than to continue the course of steady repair, occasionally substituting Iron for Wood, with which you were already proceeding.

The Centre Transept, however, demanded a more substantial mode of treatment. Owing to the haste with which this portion of the Building was constructed, a considerable portion of Timber was originally introduced, which, from lapse of time, had become partially decayed. The extraordinary Gales of the spring of 1861, following those of former years, had, through the immense pressure they exerted over the large area of the Western front of the Transept, deranged the whole of the Framing of that front, and the semi-circular timber Fans which fill in the upper part under the Roof. In fact, the whole of this part of the Transept had been so much strained by the wind, that it demanded a prompt and complete repair before a recurrence of similar weather, which, in its then condition, might have been productive of serious consequences.

My recommendations were briefly these: I proposed to strengthen the existing columns at each end of the Transept by casing them, and connecting them firmly together, and by extending the foundations on which they rest. Also to replace the wooden columns by iron columns of the same character, inserting new girders and braces, and in some cases re-adjusting the diagonal ties. The fan-ends of the Transept I proposed to fix permanently to wrought-iron arches springing from the upright columns.

Under your instructions, and with your sanction, I placed the execution of these works in the hands of Messrs. Cochrane & Co. at contract prices.

I have the pleasure to report that the whole of this work has been completed in a thoroughly sound and efficient manner, and to my entire approval, and that this important portion of your building is now in a condition of greater permanent stability than when first constructed, and secure against the effect of any gales or storms.

It will be necessary to add some girders across the Nave, at the level of the springing of the Transept arch, to thoroughly connect the Western and Eastern ends of the Transept. These girders are already on the Company's premises, and can be erected at any convenient time.

The stability of the Centre Transept, and consequently of the whole edifice of the Palace, is materially increased by the works which have been lately carried out by your Staff in connection with the Great Orchestra.

On this matter I have to observe, that on my attention being directed to the design for the Orchestra Roof, I perceived that it might be made a valuable adjunct to the work I was then engaged upon, and suggested some modifications in its construction, which materially increased the strength of the building, at a point where such addition was very serviceable—namely, at the junction of the Naves and Transept.

By fixing wrought-iron ties to the ribs which carry the Orchestra Roof, these ribs have been converted into rigid and self-restrained arches, capable of acting either as ties or struts; and being firmly connected to the columns at each side—which columns were at the same time materially strengthened by casings—they

form a connection of the most substantial character between the opposite sides of the Transept, binding together the columns and framing on each side into one rigid system.

I am, Gentlemen,

Your obedient Servant,

EDWIN CLARK.
